

Peulat Erev – Lost... 2.0:

Goal- The chanichim will work together and get to know each other, get all their energy out before bed time.

Previously on Lost (in Ramah):

The campers landed on a deserted island called camp Ramah. They build shelters and found the code for the radio. Now, they discovered that there are “the others” at this island and they stole their only chance to leave this island...

Current events:

The campers are going to try and get their radio back from “the others”. To do so we are going to play- Capture the Flag!!!

The game is Chanichim vs. Madrichim (that are chosen- look at the bottom). The chanichim's flags are water bottles (they can't survive without water) and the madrichim's flag is the stolen radio.

\* capture the flag:

There are two teams. Each team has a flag. The madrichim assign an area for the game to run. We mark the half of the court. Each team has its own half, they hide their flag in their territory (not too hidden). Each team needs to get the other teams flag and bring it to their side (where their flag is). When a camper is on the side of the other team, any member of that team can tag him and then he is captured- he has to sit where he was tagged and wait to be rescued (a member of his team must tag him). If a camper took the flag of the other team but got tagged before reaching his team's area, he has to put the flag on the ground and sit. The winning team is the first to get the other team's flag to their side of the court.

At the end of the peula (when the campers win and gets the radio back) we realize that this is actually a really cool island and we don't want to leave..!

Sikkum- the Chanichim play the staff capture the flag in order to retrieve their stolen radio from the last peula. They win but then we all decide to stay here cause it's AWESOME! The chanichim all worked together and had fun.
