

### **Peulot Erev:**

#### Tallit Project Brainstorm

The peulot will take place in the moadon.

Adam Hirsch will start off the peulot by explaining the tallit project and how it will work. After that he will explain that this time is designated for brainstorming the design for the tallit. We will show them different types of tallit designs, using our own tallits. The campers will design their tallits on tallit templates using markers, crayons, and colored pencils from omanut. The counselors will float around to see if any campers need any assistance with their design. We will have print outs of Jewish symbols around the room in case any camper needs assistance drawing them. After that, all the Amitzimers will show off their tallit designs in a tallit design fashion show. We will use the front area of the moadon as the runway and we will play music as each camper shows off their tallit design.
